

## EMECO: 20-06 Chair

Designed by Foster & Partners, 20-06 recall's Emeco's classic 10-06 Navy Chair, while expressing a refined structure and modern inference. Both chairs have an estimated 150-year lifespan.

The sleek new chair features an ultra-slim, all aluminium (80% recycled) frame, tempered for strength and hand made at the historic Hanover Pennsylvania factory using Emeco's proprietary "77 Step Process". The ergonomically shaped aluminium seat and back are hand welded, resulting in a minimal, seamless appearance. 20-06 is super-strong, yet uses 15% less aluminium than the original Navy chair.

The lightweight chairs will stack 10 high and are guaranteed for life.
