Re-Wood Bark
Re-Wood Birch

COLOUR CONCEPT

In esclusiva per RE MAX® vengono definite due nuove palette: i toni BLEND che combinano PP riciclato e legno, e quelli SOLID dove viene adottato solo PP riciclato. Queste selezioni guardano ai bisogni contemporanei degli ambienti domestici e dei progetti di interni. Una collezione di tinte che oltre a soddisfare le richieste di un mercato dinamico ed esigente, evidenzia il carattere del materiale e la versatilità del suo aspetto.

The colour concept introduces two refined palettes that are something limited to RE MAX® only. The BLEND shades integrate recycled PP and wood, while the SOLID ones are pure recycled PP options. These specific tones combine the qualities typically found in home furnishing with the demanding requirements of the project sector. A choice of colours that enhances the material's robust character and balanced appearance.

MAX DRESSED

CONTEMPORARY UPHOLSTERED SEATS

Un rivestimento morbido e versatile che amplia possibilità cromatiche e materiali. Una presenza a tratti tecnica dove le cuciture della copertura ripercorrono le linee del prodotto enfatizzandone forma e struttura.

The ideal cover solution that not only provides a comfortable cushioning effect but also offers a wide array of chromatic and material combinations. A slightly technical look that emphasizes the robust structure of the product and its airy appearance.
